Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science)

During the last 30 years, face recognition and related problems such as face detection/tracking and facial expression recognition have attracted researchers from both the engineering and psychology communities. In addition, extensive research has been carried out to study hand and body gestures. The understanding of how humans perceive these important cues has significant scientific value and extensive applications. For example, human-computer interaction, visual surveillance, and smart video indexing are active application areas. Aiming towards putting such amazing perception capability onto computer systems, researchers have made substantial progress. However, technological challenges still exist in many aspects. Following a format similar to the IEEE International Workshop on Analysis and Modeling of Faces and Gestures (AMFG) 2003, this one-day workshop (AMFG 2005) provided a focused international forum to bring together well-known researchers and research groups to review the status of recognition, analysis and modeling of faces and gestures, to discuss the challenges that we are facing, and to explore future directions. Overall, 30 papers were selected from 90 submitted manuscripts. The topics of these papers range from feature representation, robust recognition, learning, and 3D modeling to psychology. In addition, two invited talks were given, by Prof. Kanade and Dr. Phillips. The technical program was organized into four oral sessions and two poster sessions. This workshop would not have been possible without the timely reviews provided by the members of the Technical Program Committee under a tight schedule. October 2005 Wenyi Zhao Shaogang Gong Xiaoou Tang

From reader reviews:

Tasha Page:

Do you one among people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this specific aren't like that. This Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science) book is readable by simply you who hate the straight word style. You will find the information here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to offer to you. The writer of Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science) content conveys the thought easily to understand by many individuals. The printed and e-book are not different in the content material but it just different by means of it. So , do you still thinking Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science) content conveys the thought easily to understand by many individuals. The printed and e-book are not different in the content material but it just different by means of it. So , do you still thinking Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science) is not loveable to be your top listing reading book?

Ivory Hughes:

In this time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. Often the book that recommended to your account is Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science) this book consist a lot of the information of the condition of this world now. That book was represented just how can the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. Typically the writer made some study when he makes this book. This is why this book ideal all of you.

Kenneth Harrell:

In this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple strategy to have that. What you are related is just spending your time not very much but quite enough to possess a look at some books. One of many books in the top list in your reading list will be Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science). This book which can be qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking upward and review this e-book you can get many advantages.

Blair Gant:

A lot of guide has printed but it is different. You can get it by internet on social media. You can choose the

best book for you, science, witty, novel, or whatever by means of searching from it. It is named of book Analysis and Modelling of Faces and Gestures: Second International Workshop, AMFG 2005, Beijing, China, October 16, 2005, Proceedings (Lecture Notes in Computer Science). You can include your knowledge by it. Without making the printed book, it can add your knowledge and make anyone happier to read. It is most significant that, you must aware about guide. It can bring you from one place to other place.
