Descartes: The Essential Collection René Descartes

René Descartes was a French philosopher, mathematician, and writer. Descartes is often called the *Father of Modern Philosophy*, and much of early Western philosophy is a response to his writings. Descartes writing are still studied closely to this day.

Descartes was also influential in mathematics; the Cartesian coordinate system — allowing reference to a point in space as a set of numbers, and allowing algebraic equations to be expressed as geometric shapes in a two-dimensional coordinate system (and conversely, shapes to be described as equations) — was named after him.

Descartes was also one of the key figures in the Scientific Revolution and has been described as an example of genius.

This collection contains four of his major works:

- Rules For The Direction Of The Mind (1628)
- Discourse On The Method (1637)
- Meditations On First Philosophy (1641)
- Principles Of Philosophy (1644)

Audiobooks of the works *Discourse On The Method* and *Meditations On First Philosophy* are included free of charge. Simply follow the link at the end of the collection.
