Examination of Orthopedic & Athletic Injuries Chad Starkey PhD ATC FNATA, Sara D. Brown MS LAT ATC

"This is by far the most comprehensive and user-friendly text for both professor and student! I am continuing to use it in my Athletic Training Program, and beginning next year, I will institute it into my PT courses in Ortho I & II."—Vincent J. Hudson, MS, PT, ATC, MBA, University of Central Florida, Orlando, Florida, review of a previous edition.

Completely revised and updated, the 4th Edition of the field's standard resource brings you all field's most current knowledge and an all-new full-color art program. Its superb combination of detailed illustrations and precise language makes even the most complicated concepts and techniques clear.

Organized by body region, each chapter begins with a review of anatomy and biomechanics; proceeds through clinical evaluation, pathologies, and related special tests; and concludes with a discussion of on-field or initial management of specific injuries.

The *Plus* Code inside new, printed texts gives you access to the instructor and student resources online at *DavisPlus*, including your Davis Digital Version, range of motion animations, and review questions for every chapter.
