**Data Analysis and Decision Making** S. Christian Albright, Wayne Winston, Christopher Zappe

Note: This ISBN includes Access Code. Access code is not included for rentals. DATA ANALYSIS AND DECISION MAKING is a teach-by-example approach, learner-friendly writing style, and complete Excel integration focusing on data analysis, modeling, and spreadsheet use in statistics and management science. The Premium Online Content Website (accessed by a unique code with every new book) includes links to the following add-ins: the Palisade Decision Tools Suite (@RISK, StatTools, PrecisionTree, TopRank, RISKOptimizer, NeuralTools, and Evolver); and SolverTable, allowing users to do sensitivity analysis. All of the add-ins is revised for Excel 2007 and notes about Excel 2010 are added where applicable. About This Edition New Features Chapters 2 and 3 are completely rewritten and reorganized, focusing on the description of one variable at a time, and relationships between variables. Both chapters have more coverage of categorical variables, as well as new and more interesting data sets in the examples. Many of the problems in previous editions were deleted or updated, and a number of brand new problems were added for relevance to current statistical analysis. A problem guide is available to instructors showing the context of each of the "data" problems, and it also shows the correspondence between problems in this edition and problems in the previous edition. The previous edition's Chapter 4 is renamed Chapter 17, "Importing Data into Excel," and is completely rewritten with its section on Excel tables located in Chapter 2. (Previous edition chapters 5-17 were renumbered 4-16.) The book is still based on Excel 2007, but notes about changes in Excel 2010 have been added where they apply. Specifically, there is a small section on the new slicers for pivot tables, and there are several mentions of the new statistical functions (although the old functions still work). Each chapter now has 10-20 more consistent and relevant "Conceptual Questions" in the end-of-chapter sections. The first two linear programming examples in Chapter 13 (replacing the former Chapter 14) are replaced by two product mix models, where the second builds on the first. The previous "diet" model was overly complex as a first linear programming example. Several chapter-opening vignettes are replaced with newer and more interesting ones and there are now many short "fundamental insights" throughout the chapters. These insights are designed to allow the students to step back from the details and see the really important ideas. All updated screenshots and accompanying explanations to reflect Excel 2007 and updated add-ins. Tips on Excel 2010 have been added where applicable. This edition now provides access to Excel add-in software via an access code to a Premium Online Content Website for every student purchasing a new book. Instructors' Resource CD: PowerPoints, and Solutions, Case, and Example files have been updated to reflect the core text 4th edition. The Test Bank has been updated with new questions and is now offered in ExamView testing software.

### **From reader reviews:**

#### **Karla Whisenant:**

Within other case, little folks like to read book Data Analysis and Decision Making. You can choose the best book if you appreciate reading a book. As long as we know about how is important a new book Data Analysis and Decision Making. You can add know-how and of course you can around the world by a book. Absolutely right, due to the fact from book you can learn everything! From your country till foreign or abroad you can be known. About simple factor until wonderful thing you are able to know that. In this era, we can open a book or perhaps searching by internet product. It is called e-book. You should use it when you feel bored stiff to go to the library. Let's go through.

#### **George Kirby:**

Spent a free a chance to be fun activity to complete! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Will you something different to fill your current free time/ holiday? May be reading a book might be option to fill your free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the book untitled Data Analysis and Decision Making can be great book to read. May be it might be best activity to you.

#### **Michael Farrell:**

A lot of people always spent their own free time to vacation as well as go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read any book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent all day every day to reading a publication. The book Data Analysis and Decision Making it doesn't matter what good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In case you did not have enough space to deliver this book you can buy typically the e-book. You can m0ore simply to read this book out of your smart phone. The price is not too expensive but this book has high quality.

#### **Frank Johnson:**

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some guide, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the trainer want, like asked to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring as well as can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach

Chinese's country. Therefore this Data Analysis and Decision Making can make you really feel more interested to read.
