"Poetics of the Iconotext" makes available for the first time in English the theories of the respected French text/image specialist, Professor Liliane Louvel. A consolidation of the most significant theoretical materials of Louvel's two acclaimed books, "L'Oeil du Texte: Texte et image dans la littérature anglophone" and "Texte/Image: Images a lire, textes a voir", this newly conceived work introduces English readers to the most current thinking in French text/image theory and visual studies. Focusing on the full spectrum of text/image relations, from medieval illuminated manuscripts to digital books, Louvel begins by introducing key terms and situating her work in the context of significant debates in text/image studies. Part II introduces Louvel's typology of pictorial saturation through which she establishes a continuum along which to measure the effect of the most figurative to the most literal images upon writerly and readerly textual 'spaces'. Part III adopts a phenomenological approach towards the reading-viewing experience as expressed in conceptual categories that include the trace, focal range, synesthesia, and rhythm and speed. The result is a provocative interplay of the categorical and the subjective that invites readers to think at once more precisely and more inventively about texts, images, and the intersections between the two.
