Visualising Magnetic Fields: Numerical Equation Solvers in Action

John Stuart Beateson

Visualising Magnetic Fields: Numerical Equation Solvers in Action John Stuart Beateson

Visualizing Magnetic Fields: Numerical Equation Solvers in Action provides a complete description of the theory behind a new technique, a detailed discussion of the ways of solving the equations (including a software visualization of the solution algorithms), the application software itself, and the full source code. Most importantly, there is a succinct, easy-to-follow description of each procedure in the code.

The physicist Michael Faraday said that the study of magnetic lines of force was greatly influential in leading him to formulate many of those concepts that are now so fundamental to our modern world, proving to him their "great utility as well as fertility." Michael Faraday could only visualize these lines in his mind's eye and, even with modern computers to help us, it has been very expensive and time consuming to plot lines of force in magnetic fields.

- * Overview of the physics of magnetic fields
- * Complete description of the theory behind the new technique
- * Overview of the theory of Gaussian elimination and Conjugate Gradient equation solvers (including a software application to visualise the algorithms in action)
- * Application software itself, the full-source code and a plain English description of each procedure in the code

From reader reviews:

Joaquin Hogan:

Nowadays reading books be a little more than want or need but also get a life style. This reading addiction give you lot of advantages. Associate programs you got of course the knowledge even the information inside the book which improve your knowledge and information. The details you get based on what kind of publication you read, if you want get more knowledge just go with schooling books but if you want experience happy read one using theme for entertaining such as comic or novel. Often the Visualising Magnetic Fields: Numerical Equation Solvers in Action is kind of reserve which is giving the reader unforeseen experience.

Ann Fout:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Having book everyone in this world can share their idea. Guides can also inspire a lot of people. Plenty of author can inspire their own reader with their story or perhaps their experience. Not only the story that share in the textbooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on this planet always try to improve their skill in writing, they also doing some investigation before they write to the book. One of them is this Visualising Magnetic Fields: Numerical Equation Solvers in Action.

Sandra Castillo:

You could spend your free time you just read this book this publication. This Visualising Magnetic Fields: Numerical Equation Solvers in Action is simple to bring you can read it in the recreation area, in the beach, train and also soon. If you did not include much space to bring the actual printed book, you can buy the e-book. It is make you much easier to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Allison Larson:

Don't be worry should you be afraid that this book will filled the space in your house, you might have it in e-book approach, more simple and reachable. This Visualising Magnetic Fields: Numerical Equation Solvers in Action can give you a lot of close friends because by you looking at this one book you have factor that they don't and make a person more like an interesting person. This book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't understand, by knowing more than additional make you to be great men and women. So , why hesitate? We should have Visualising Magnetic Fields: Numerical Equation Solvers in Action.
