Molecular and Cellular MR Imaging

Molecular and Cellular MR Imaging

The ability of molecular and cellular imaging to track the survival, migration, and differentiation of cells in vivo as well as monitor particular gene expression in living subjects is rapidly moving from the research laboratory into daily clinical settings. The interdisciplinary nature of the field mandates a constant dialogue among molecular and cellular biology, chemistry, physics, image analysis, and drug discovery to develop and translate promising approaches into reliable scientific applications and viable clinical diagnostic tools.

Bringing together a select panel of internationally recognized authors, *Molecular and Cellular MR Imaging* provides a state-of-the-science overview of the multidisciplinary nature of the field and illustrates the application of these various sciences to investigate specific biological processes in animals and humans. Using a systematic organization to present diverse information, the text begins with an introductory chapter that defines cellular and molecular imaging and explains why magnetic resonance imaging (MRI) is the most versatile approach for noninvasive, in vivo studies. The first section examines the physicochemical principles of various contrast agents including paramagnetic, superparamagnetic, CEST, and PARACEST agents, as well as smart and sensing agents. The second section summarizes the wide variety of applications for molecular imaging of genes and of disease states. Contributions cover cancer, apoptosis, cardiovascular and neurodegenerative disease, and the use of pharmacological MRI. The third section is devoted to cellular imaging under a variety of applications, and the final section discusses the translational aspects and future directions of cellular and molecular MR imaging.

Molecular and Cellular MR Imaging highlights the diversity of skills required to translate advancements in various fields of research into practical applications that promise to revolutionize in vivo imaging as a diagnostic tool.

From reader reviews:

Ellen Kelsey:

Why don't make it to become your habit? Right now, try to prepare your time to do the important work, like looking for your favorite publication and reading a book. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Molecular and Cellular MR Imaging. Try to make the book Molecular and Cellular MR Imaging as your friend. It means that it can be your friend when you sense alone and beside associated with course make you smarter than before. Yeah, it is very fortunate for you personally. The book makes you far more confident because you can know everything by the book. So, let me make new experience as well as knowledge with this book.

John Masterson:

The event that you get from Molecular and Cellular MR Imaging could be the more deep you looking the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to comprehend but Molecular and Cellular MR Imaging giving you enjoyment feeling of reading. The writer conveys their point in particular way that can be understood by anyone who read that because the author of this e-book is well-known enough. That book also makes your vocabulary increase well. Making it easy to understand then can go with you, both in printed or e-book style are available. We recommend you for having this specific Molecular and Cellular MR Imaging instantly.

Joseph Vargas:

This Molecular and Cellular MR Imaging is great book for you because the content and that is full of information for you who always deal with world and still have to make decision every minute. This kind of book reveal its facts accurately using great coordinate word or we can declare no rambling sentences within it. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only offers you straight forward sentences but hard core information with wonderful delivering sentences. Having Molecular and Cellular MR Imaging in your hand like getting the world in your arm, info in it is not ridiculous. We can say that no reserve that offer you world within ten or fifteen minute right but this publication already do that. So, this can be good reading book. Hey Mr. and Mrs. busy do you still doubt that will?

Lorraine Stark:

Reading a book being new life style in this season; every people loves to study a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself look for a fiction books, this kind of us novel, comics, and soon. The Molecular and Cellular MR Imaging provide you with a new experience in looking at a book.
