## Cultural Sutures: Medicine and Media

Medicine and the media exist in a unique symbiosis. Increasingly, health-care consumers turn to media sources—from news reports to Web sites to tv shows—for information about diseases, treatments, pharmacology, and important health issues. And just as the media scour the medical terrain for news stories and plot lines, those in the health-care industry use the media to publicize legitimate stories and advance particular agendas. The essays in *Cultural Sutures* delineate this deeply collaborative process by scrutinizing a broad range of interconnections between medicine and the media in print journalism, advertisements, fiction films, television shows, documentaries, and computer technology.

In this volume, scholars of cinema studies, philosophy, English, sociology, health-care education, women's studies, bioethics, and other fields demonstrate how the world of medicine engages and permeates the media that surround us. Whether examining the press coverage of the Jack Kevorkian–euthanasia controversy; pondering questions about accessibility, accountability, and professionalism raised by such films as *Awakenings*, *The Doctor*, and *Lorenzo's Oil*; analyzing the depiction of doctors, patients, and medicine on *E.R.* and *Chicago Hope*; or considering the ways in which digital technologies have redefined the medical body, these essays are consistently illuminating and provocative.
