Architecture and Patterns for IT Service Management, Resource Planning, and Governance: Making Shoes for the Cobbler's Children, Second Edition Charles T. Betz

Information technology supports efficient operations, enterprise integration, and seamless value delivery, yet itself is too often inefficient, un-integrated, and of unclear value. This completely rewritten version of the bestselling Architecture and Patterns for IT Service Management, Resource Planning and Governance retains the original (and still unique) approach: apply the discipline of enterprise architecture to the business of large scale IT management itself. Author Charles Betz applies his deep practitioner experience to a critical reading of ITIL 2011, COBIT version 4, the CMMI suite, the IT portfolio management literature, and the Agile/Lean IT convergence, and derives a value stream analysis, IT semantic model, and enabling systems architecture (covering current topics such as CMDB/CMS, Service Catalog, and IT Portfolio Management). Using the concept of design patterns, the book then presents dozens of visual models documenting challenging problems in integrating IT management, showing how process, data, and IT management systems must work together to enable IT and its business partners. The edition retains the fundamental discipline of traceable process, data, and system analysis that has made the first edition a favored desk reference for IT process analysts around the world. This best seller is a must read for anyone charged with enterprise architecture, IT planning, or IT governance and management.

- Lean-oriented process analysis of IT management, carefully distinguished from an IT functional model
- Field-tested conceptual information model with definitions and usage scenarios, mapped to both the process and system architectures
- Integrated architecture for IT management systems
- Synthesizes Enterprise Architecture, IT Service Management, and IT Portfolio Management in a practical way

Often the writer made some research when he makes this book. This is why this book acceptable all of you.

Donald Spada:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library or to make summary for some e-book, they are complained. Just little students that has reading's internal or real their interest. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that studying is not important, boring along with can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you personally. As

we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Architecture and Patterns for IT Service Management, Resource Planning, and Governance: Making Shoes for the Cobbler's Children, Second Edition can make you sense more interested to read.
