Fatima Revisited: The Apparition Phenomenon In Ufology, Psychology, and Science (Fatima Trilogy)

The Fátima Incident of 1917 was a critical event in the history of the paranormal. Believers and skeptics have long pondered the identity of Our Lady of Fátima, the brilliant entity who appeared above Fátima. Was she the Virgin Mary, sharing divine secrets with believers? Was she an angel, bringing a message of peace to a world at war? Or was she an alien being, inspiring humanity to look up and contemplate the mystery of the Cosmos? Now, in Fátima Revisited, an international panel of top scholars subjects the legendary apparitions of Fátima - widely regarded as a sacred religious event - to the scrutiny of modern scientific analysis; explores the connections between encounters with apparitions, angels, and aliens; and proposes a new paradigm for such unexplained phenomena. This third volume in the acclaimed trilogy, which includes the definitive histories of the Fátima case entitled Heavenly Lights and Celestial Secrets, is the result of a transdisciplinary study by the Multicultural Apparitions Research International Academic Network (Project MARIAN) at the University Fernando Pessoa in Porto, Portugal.
