Federal Administrative Law, Cases and Materials (University Casebook Series)

Kristin Hickman, Richard Pierce Jr

Federal Administrative Law, Cases and Materials (University Casebook Series) Kristin Hickman, Richard Pierce Jr

This casebook is designed with an emphasis on accessibility, includes many discussion problems and questions focusing on real-world application, and gives students a solid grounding in the basic principles of administrative law that they might come across in regulatory practice. While it pays due attention to the historical evolution of the doctrine in certain areas, this casebook focuses more heavily on current standards. Administrative law as a subject matter encompasses some very interesting theoretical discussions. Rather than remain strictly theoretical to the point of bordering on encyclopedic, this book tends toward the more practical, while still including enough reference to theory to enable a professor who wants to introduce more theoretical discussion into the classroom to do so.

The new edition includes sufficient material to support an advanced administrative law course taught to students with previous exposure to the regulatory state. The author created additional teaching resources to assist in using the book for such a course.

The casebook is supported by an extensive teacher's manual and website, www.hickmanpierce.com. Adopters can access this frequently updated site to find excerpts of new cases and other helpful supplementary materials.
