In today's global recession, strong management of firms and organizations are of the utmost importance. Economics of strategy focuses on the key economic concepts students must master in order to develop a sound business strategy. The text also brings economic theory and strategic analysis to life in an engaging and uniquely modern way. Besanko, dranove, shanley and schaefer have collaborated for over 15 years to build an introductory business course that combines basic concepts from economic theory of the firm and industrial organization with ideas from modern strategy literature.introductionsimple linear regressionmultiple linear regressionregression diagnostics: detection of model violationsqualitative variables as predictorstransformation of variablesthe problem of correlated errorsanalysis of collinear dataworking with collinear datavariable selection procedureslogistic regression
