Risk Management for Food Allergy (Food Science and Technology)

Risk Management for Food Allergy (Food Science and Technology)

Risk Management for Food Allergy is developed by a team of scientists and industry professionals who understand the importance of allergen risk assessment and presents practical, real-world guidance for food manufacturers.

With more than 12 million Americans suffering from food allergies and little indication of what is causing that number to continue to grow, food producers, packagers and distributors need to appropriately process, label and deliver their products to ensure the safety of customers with allergic conditions. By identifying risk factors during processing as well as determining appropriate "safe" thresholds of ingredients, the food industry must take increasingly proactive steps to avoid direct or cross-contamination as well as ensuring that their products are appropriately labeled and identified for those at risk.

This book covers a range of critical topics in this area, including the epidemiology of food allergy, assessing allergen thresholds and risk, specifics of gluten management and celiac disease, and much more. The practical advice on factory risk management, catering industry practices, allergen detection and measurement and regulatory controls is key for food industry professionals as well as regulators in government and other public bodies.

*Science-based insights into the potential risks of food allergens *Focused section on determining thresholds

*Practical guidance on food allergen risk management, including case studies

From reader reviews:

Colleen Nguyen:

A lot of people always spent their very own free time to vacation or maybe go to the outside with their friends and family or their friend. Are you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity that's look different you can read any book. It is really fun for yourself. If you enjoy the book that you just read you can spent all day long to reading a publication. The book Risk Management for Food Allergy (Food Science and Technology) it is quite good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. In the event you did not have enough space to create this book you can buy the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not too expensive but this book provides high quality.

Ruth Lynch:

People live in this new morning of lifestyle always try and and must have the spare time or they will get wide range of stress from both lifestyle and work. So , when we ask do people have free time, we will say absolutely sure. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to a person of course your answer will certainly unlimited right. Then do you try this one, reading guides. It can be your alternative within spending your spare time, the actual book you have read is definitely Risk Management for Food Allergy (Food Science and Technology).

Francis Pilkington:

Reading a book to become new life style in this year; every people loves to study a book. When you study a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, as well as soon. The Risk Management for Food Allergy (Food Science and Technology) provide you with a new experience in studying a book.

Mae Bushee:

As a university student exactly feel bored for you to reading. If their teacher asked them to go to the library or even make summary for some publication, they are complained. Just very little students that has reading's spirit or real their interest. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Risk Management for Food Allergy (Food Science and Technology) can make you feel more interested to read.
